

SUMIT KUMAR JAISWAL

+91-6204553359 | sumitjaiswalskj9334@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

Education

Indian Institute of Technology, Patna

Bachelor of Science in Computer Science and Data Analytics | CGPA: 9.13

2023 – 2027

Patna, Bihar

Professional Development

Amazon ML Summer School 2026

Selected Participant | Top 2% Nationwide

Jul 2026

Remote

- Selected among 3,000 finalists from 134,421+ applicants nationwide for Amazon's ML program.
- Covering an 8-module curriculum: Supervised/Unsupervised Learning, Deep Neural Networks, Generative AI & LLMs, Reinforcement Learning.
- Mentored directly by Amazon Applied Scientists and Research Scientists on real-world ML applications..

Projects

AttendAI | Python, OpenCV, Streamlit, Supabase

[Live](#) | [GitHub](#)

- Built an AI attendance system with 95%+ face-recognition accuracy, demoed across 100+ students.
- Cut attendance-taking time from 10 minutes to under 30 seconds using automated cloud-backed recording.
- Designed role-based workflows for students/teachers covering enrollment, attendance, and report generation.
- Added voice-based verification and exportable reports for improved reliability and reduced manual effort.

StyleForge AI | PyTorch, AdaIN, Flask, Computer Vision

[Live](#) | [GitHub](#)

- Implemented AdaIN-based neural style transfer, generating stylized images in 3–5 seconds per output.
- Validated output quality across 30+ style-content combinations for consistent, high-quality blending.
- Built a Flask app with image uploads, adjustable style strength, and downloadable results.
- Created a deployment-ready PyTorch inference pipeline for fast, end-to-end image transformation.

Legal Setu | Gemini API, Node.js, Express.js, NLP

[Live](#) | [GitHub](#)

- Developed an AI legal-tech platform with 6+ features: document analysis, chatbot, attorney marketplace, messaging.
- Built an LLM pipeline supporting 3 file formats (PDF/DOCX/TXT) to summarize and flag legal risks via Gemini API.
- Built secure JWT-authenticated backend APIs with MongoDB for document upload, storage, and AI analysis.
- Designed prompt-engineering and JSON parsing workflows for reliable, structured legal insights.

Technical Skills

Languages: Python, Java, JavaScript, SQL

Machine Learning: Regression, Random Forest, SVM, KNN, Clustering, PCA

Deep Learning: ANN, CNN, RNN, LSTM, Transformers

Generative AI & NLP: NLP, LLMs, RAG, LangChain, Embeddings, VectorDB

Libraries & Frameworks: Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, OpenCV

Web Technologies: React.js, Node.js, Express.js, MongoDB, Flask, REST APIs, Git, GitHub

Relevant Coursework

- | | |
|--------------------------------|-------------------------------|
| • Data Structures & Algorithms | • Database Management Systems |
| • Operating Systems | • Machine Learning |
| • Object-Oriented Programming | • Deep Learning |
| • Computer Networks | • Artificial Intelligence |

Achievements

- Solved **300+** DSA problems across different coding platforms, strengthening core problem-solving and interview readiness.
- Advanced to the final **8 teams (out of 500+)** at the Executive Desk competition, E-Summit IIT Patna.
- Completed the **6-week Summer of Quant** program organized by Quant Club, IIT Kharagpur
